THE MARKETS.

Wall Street Review.

New York, May 17.—The fever and nervousness were practically gone out of the stock market today. There was a real impressive demonstration of confident strength, which was somewhat intermittent and spotty in the early dealing, but which grew and broadened out to a general and solid boom with a buoyant period which reached the date of the early period of the late boom. The strength in the market was principally based on general confidence in the future, and a fairly large number of stocks influenced by a potent factor in its sympathetic effect on the market; Broadly stated, the feeling that prices in general would rise and that losses will be bought out of the market, while the business conditions of the country and the earning power of properties were unimpaired by the buying and selling of stocks. The market has been quieted, and the market has been completed so far as to leave the way open for renewed advances. The indications for tomorrow's high statement were of such a strong recuperative tendency that the market is said to be probably more in the future. The better prospect of a settlement with the machines and the progress of measures toward the organization of the national standard corporation cannot be denied by the selection of new directors induced by the United States Steel stocks. Reports of large deposits made with Standard Oil are explained by the fact that standard oil is half of closer relatives, however, the Pennsylvania and Continental Petroleum companies. Standard Oil is to be largely controlled by the subsidiary coal carrying roads, such individual causes of strength might be considerably extended, and it may be said that the market's strength is greater all the way from 2 to 10 points to come, as shown by an extended list of stocks and their last prices were practically the top. The total market value of all stocks was \$1,500,000,000. The bond market was broad and prices were well sustained. Total sales, per value, \$1,500,000,000. U. S. 8s declined 34 per cent. on the last call.
